

Template for NASA's Nancy Grace Roman Space Telescope's Team Expertise Document

[The first page of this template contains general information and instructions; please remove it before submitting your proposal.]

The NASA Roman proposal review uses a Dual Anonymous Proposal Review (DAPR) process. We have prepared [Guidelines for Proposers](#) to assist with the preparation of your proposal in order to comply with DAPR. This template is for the Team Expertise document that must accompany each Cycle 1 proposal. It includes the non-anonymized information for your proposal. **Use of this template is required.**

This section should provide a description of the expertise, background, and roles of key team members, as they relate to the science proposed. This section should be limited in length to two pages; for most proposals, two or three paragraphs will suffice. For proposals with a large number of Co-Investigators, it is not necessary to report on the qualifications of every team member, nor is it necessary to provide a bio of all the team members—just the top contributors to the analysis of the program will suffice. If proposers wish, they can identify the PI in this section.

The proposers should follow the same formatting guidelines as the Scientific Justification PDF document, specifically, adopt a font size no smaller than 12pt, and have one inch margins on all sides as printed on a 8.5 x 11-inch paper.

1 Team Expertise (up to 2 pages)
